PROFESSIONAL SUMMARY

Associate Data Analyst with hands-on experience across the full BI delivery cycle — migrating **15+ SAP BusinessObjects reports** to **Power BI** and building **6 client-facing dashboards** for **Warner Bros. Discovery** and **Johnson & Johnson MedTech**, with a **100% UAT sign-off rate**. Strong in **DAX, Power Query, and SQL** data profiling/validation. Built an **LLM-powered Auto Insight Generator (NVIDIA NIM + LangChain)** that cut dashboard generation time from hours to **under 2 minutes**

EDUCATION

Shri Ramdeobaba College of Engineering and Management, Nagpur
Bachelor of Technology (B.Tech) — Biomedical Engineering | CGPA: 7.45/10

Dec. 2021 – May. 2025

TECHNICAL SKILLS

BI & Visualization: Power BI, DAX, Tableau, MicroStrategy, SAP BusinessObjects, Dashboard Development, KPI Reporting, Power Apps

Databases & Data Engineering: SQL, MySQL, SQL Server, Data Cleaning, Data Modeling, Data Visualization, Data Validation, Data Governance, Data Profiling, Power Query

Programming & AI: Python, Pandas, NumPy, Matplotlib, REST APIs, Git, LLM Integration, NVIDIA NIM, LangChain, Generative AI, AI-Assisted Automation, GitHub Copilot, AI Reporting

Report & Productivity: Advanced Excel (Pivot Tables, XLOOKUP, VLOOKUP, INDEX/MATCH, Power Query), AI in Excel, SharePoint, PowerPoint, Business Reporting, Cross-functional Collaboration, Microsoft Copilot

WORK EXPERIENCE

Associate Analyst

Dec. 2025 - Present

InCredo Technologies . Nagpur, Maharashtra

- Led **SAP BusinessObjects to Power BI** migration for **Warner Bros. Discovery**, rebuilding **15+ reports** and **4 dashboards** through **DAX authoring, SQL profiling**, and row-level reconciliation — eliminating all discrepancies to secure **zero-defect UAT sign-off** and unblock a coordinated overseas go-live.
- Replaced a manual reporting process for **Johnson & Johnson MedTech** with **2 production Power BI dashboards (Power Query, DAX)**, then engineered an **LLM-powered Auto Insight Generator** that **cut client delivery time from 3 hours to under 2 minutes** — a **98% reduction**.
- Applied **AI-assisted prototyping** and **generative design tools** to accelerate dashboard ideation cycles, translating ambiguous business briefs into validated visual specifications ahead of traditional review timelines.

Data Analyst Intern

Sep. 2025 – Dec. 2025

InCredo Technologies . Nagpur, Maharashtra

- Owned the full reporting pipeline — **SQL extraction** through stakeholder-approved publication — shipping **10+ dashboards** across **Power BI, Tableau, and MicroStrategy**, catching data errors upstream **before** they reached client-facing production.
- Validated **ETL queries** across **MySQL** and **SQL Server**, running **EDA** on enterprise datasets to surface anomalies pre-release — directly improving output accuracy for downstream reporting.
- Embedded **AI-powered pattern-recognition** and **anomaly-flagging** techniques into **EDA** workflows, accelerating identification of data irregularities across high-volume datasets and reducing manual inspection cycles.

SQL Intern

Jun. 2025 – Jul. 2025

InCredo Technologies . Nagpur, Maharashtra

- Authored **SQL scripts** (joins, aggregations, subqueries) to pull and transform data from relational databases, feeding **3+ business-facing reports**; identified and resolved query bottlenecks over **1 month**, improving reporting accuracy and delivery speed.
- Leveraged **AI code-assistance (GitHub Copilot)** to accelerate query drafting, minimize syntax errors, and surface optimized join strategies — shortening development cycles for complex multi-table transformations.
- Produced a parameterized **SQL template library** and an extraction best-practices guide, eliminating redundant scripting efforts and establishing a repeatable standard for future data retrieval requests.

PROJECTS

AutoInsight – AI-Powered Dashboard Generator | Personal Project

Aug. 2025 – Aug. 2025

- Architected an AI analytics platform using **NVIDIA LLM** across **4 data source types** (CSV, SQL Server, MySQL, live Power BI), **cutting report generation from hours to seconds** and enabling real-time, data-driven decisions.
- Integrated **NVIDIA NIM** and **LangChain** into a natural language query engine — removing the SQL barrier entirely so non-technical business users could self-serve AI-generated insights.
- Engineered a **modular backend** with plug-and-play connectors for data sources and LLM providers, allowing seamless expansion without structural refactoring — positioning the platform for **enterprise-scale adoption**.

Johnson & Johnson MedTech | Client Project

Mar. 2026 – Jul. 2026

- Built **2 Power BI dashboards** (D3&I Resource Management, Product Portfolio) tracking **6 KPI areas** — resource capacity, SLA adherence, deployment performance, product health, releases, budget — using **Power Query** and **DAX**.
- Designed **4 interactive visualization types** (KPI cards, slicers, drill-through pages, paginated tables), giving stakeholders self-serve access to resource and portfolio insights for faster decision-making.
- Enforced **Row-Level Security (RLS)** and **role-based access controls** within both dashboards, safeguarding sensitive data in compliance with enterprise **governance requirements**.

- Rebuilt **15+ SAP BusinessObjects reports** and **4 dashboards** in **Power BI**, designing new data models and **Power Query** transformations to replicate and enhance legacy enterprise reporting.
- Ran a **3-step validation process** (SQL profiling, cleansing, row-level reconciliation) between SAP BO and Power BI, resolving **all** discrepancies to secure client sign-off during a coordinated go-live.
- Produced a **field-level migration map** linking each legacy SAP BO element to its Power BI counterpart — serving as the **definitive QA reference** and enabling auditable approval across all client and internal reviewers.

CERTIFICATIONS

- **Databricks Certified Data Analyst Associate** – Databricks Sep. 2026
- **Data Analytics Essentials** - Cisco Jul. 2024
- **Introduction to Data Analyst** - IBM Aug. 2024

ACHIEVEMENTS

- Published Research Paper titled: "**Zinc-Oxide Nanofiber and Green Synthesized Silver Nanoparticle Based Enzymatic Chemiresistive Sensor for Glucose Detection**" on ResearchGate. Link: <https://www.researchgate.net/publication/382675555>
